

Medical Equipment Inspection Service

Medical Equipment Support

Scope of Service

Medical Equipment Support, Inspection Services, offers clients a wide array of services to ensure patient care equipment is working properly and safely. From consultation services to repairs to accreditation safety inspections, our support services are one of the most comprehensive available. We have been providing professional and cost efficient support services to the southern California area since 1986. In addition to our main Ontario office we have several satellite offices throughout the region; Victorville, Palm Springs, Redlands, Santa Ana and Buena Park. We are affiliated with several other biomedical service companies in the LA area.

Medical Equipment Inspection Services can provide the necessary Periodic Inspection Service, operational testing and electrical safety inspections in accordance with accreditation protocol, California Title 22 Division 5; Licensing and Certification of Health Facilities requirements, NFPA 99 -2001 and provide appropriate documentation/ labeling in accordance with accreditation protocol. A service binder with service reports, policy and procedures manual, technical support, device alerts and agreement documentation will be provided to the facility and updated periodically as part of the service agreement. Agreements are customized to meet the client's accreditation requirements using FDA/ECRI standard risk assessments for patient care equipment inspection procedures. All facilities have on-line access to all their equipment records through equipmentfiles.com
